More Talk

About Time.

Some people are peculiar in the matter of buying a Watch. A silver Watch is good enough for one man so long as it keeps good time. Another one wants something a little more showy---a gold one---but it, too, must keep good time. Some want a high-priced Watch, others a cheaper one, but after all everybody wants a correct timepiece. We selected our stock with time in view, and can sell you a high, low or medium-priced Watch ---and any of them will keep time---the essential point.

We repair Watches so that we can guarantee them to keep time. Charges low.

OUR WASHINGTON MAN.

THE LEDGER'S SPECIAL LETTER FROM THE CAPITAL.

Special Correspondence Public Ledger.

WASHINGTON, Feb. 26th, 1897.

McKinley Law rates are going to be the

rule in the new Tariff Law. The Ways

and Means Committee is very "shy"

about the details of its work on the new

Tariff Bill. There are good and sufficient

reasons for that attitude on the part of its

members. They say frankly that if they

give to the public the details of their

work before it is completed, there will, of

course, be in a country of seventy five

million people, many who will be disas-

ted with the protection given to their

special interests, and the result of the

announcement of the details of the bill

would be to bring down upon them over-

whelming demands of such unreasonable

character that they could not possibly

comply with them.

"You may say, however," said one of

the members of the committee, in answer

to a question from your correspondent,

"that McKinley Law rates are going to

prevail in the bill and especially in these

features of the bill which relate to farm-

ers and farm products."

The manufacturers of the East have not

been as extreme in their demands for a

high rate of Protection as on former oc-

casions, but the agriculturists, and the

Western manufacturers have been espe-

cially desirous of a restoration of the rates

of the McKinley Law, and they are going

to get it in most cases. The committee

is especially desirous of complying with

the wishes of the farmers in the framing

of the bill as far as possible, and as the

farmers wanted a return to McKinley

rates on their products, they are going to

get it in nearly all cases.

WASHINGTON AS A PROTECTIONIST.

The celebration of Washington's birth-

day, coming in close conjunction with

the work on the Protective Tariff Bill at

the House end of the Capitol, suggests

something about Washington as a Protec-

tionist. The first subject discussed by the
